

Average REALTORS® use their cell phones as their contact number.

ABOVE-average REALTORS® use Mobile Manager.

# MOBILE MANAGER

For REALTORS® who treat their business like a real business

- An extraordinarily powerful service
- Unifies your phones (landline, cell), fax and email using a universal personal telephone number
- Choose local or toll-free
- Only \$18.95/month
- No risk, month-by-month contract
- No equipment to buy
- Nothing to install
- No overhead
- Networks multiple offices

## AGENTS' ADVANTAGE

- Increase transactions, more than agents who use cell phones *only*, because calls coming into the office regardless of time of day, are always routed to an agent's phone of choice.
- Reduce cell usage and cell costs by as much as 50%.
- Redirect your calls as you change locations, or use the iPhone app that directs calls automatically as you change locations.
- Unlimited, confidential electronic faxing, both in-bound and outbound.
- Smart Phone users can view faxes on their Smart Phone and listen to voicemail messages with a touch of a link.
- Faxes and voicemail messages can be forwarded to anyone's email.

## BROKERS' ADVANTAGE

- Increase transactions in your office without increasing agent count, marketing budget, or capital expense.
- Do away with costly and limited voicemail systems and opt instead for OneCall's Mobile Manager program. Used in conjunction with SmartOffice (after-hours menu), Mobile Manager allows calls to be directed to any phone your agents wish, any time night or day, regardless of whether the prospect called your office or the agent directly.
- Mobile Manager, as used by all of your agents, provides the office with convenient-to-use group voicemail. Voicemail messages are immediate, whereas group e-mail often goes unread.
- Network multiple offices with no capital expense.
- Reduce your overhead. Remember \$1 saved goes directly to the bottom line.
- Requires minimal administration by your staff.
- Electronic faxes received in an agent's pass code protected account, reduces your exposure to risk associated with privacy laws.

## "AN EXTRAORDINARY TOOL"

**"I got a \$368,000 sale I never would have gotten had I not had Mobile Manager. This has happened three or four times since then too."**

*Candy Heath  
Vice President,  
Coldwell Banker*

## "FINE WINE"

**"I call it 'voice management' because to compare it to 'voicemail' would be like comparing a fine wine to grape juice."**

*Jay Burnham  
Vice President, Coldwell  
Banker Residential  
Brokerage, Beverly, MA*

## "EXCEPTIONAL COMMUNICATIONS SOLUTION..."

**"...an exceptional communications solution for our company's 1,500 associates and staff... OneCall provides a 'whatever-it-takes' attitude in delivering the service."**

*Bill Gamelli  
Sr. Vice President, William  
Raveis Real Estate*

“Decide what you want, decide what you are willing to exchange for it. Establish your priorities and go to work.” – DALE CARNEGIE

The average agent limits communication to his cell phone. If you want more, then make your priority to increase transactions. Start today with Mobile Manager.

“...BEST COMMUNICATION SYSTEM IN THE (REAL ESTATE) INDUSTRY.”

“One of my biggest sales required the entire contract to be faxed for signature; with Mobile Manager, it was easy to do. All parties used my Mobile Manager number and I simply transferred the information back and forth. Mobile Manager allowed me to store the documents so when it came time to send confidential information to other parties, I was able to do it at anytime from either my office, home or laptop. It is dependable, reliable with excellent customer service, and very affordable. I look forward to keeping this technology for many years.”

Mike Ross,  
Coldwell Banker

## MOBILE MANAGER = MOBILE FREEDOM

### Make a Fortune 500 Impression

Agents aren't the only ones who benefit from Mobile Manager. Customers do too!

When you use your Mobile Manager, customers only have to remember one number, and they no longer get aggravated wondering which phone number to dial at which time of day.

Customers don't have to interrupt you with a live call if they only want to leave a message, and they can be sent to voice mail, without being the wiser, if you choose not to take their calls live.

What's more, they no longer know where they are reaching you (so make a deal from Myrtle Beach if you like!)

### No More Brick-and-Mortar Limitations

## HOW IT WORKS

GPS technology on your iPhone allows you to take calls on any phone based upon your location. Program your usual locations one time, using the included map feature. The system pinpoints or tags your location and activates the corresponding phone each time you arrive at that location.

### CUSTOM SOLUTIONS

With Find-Me-Follow-Me Technology, you choose where your calls will ring. You can use your cell phone, or forward calls to any phone, anywhere, anytime. You can even set up a calendar online for directing calls.

### WEB SOLUTIONS

You can unify the Internet with your voicemail and faxes, all using just one number. You can receive faxes, view them, print them, and forward them. You can even view a record of your calls and faxes in your online account.

### EBUSINESS SOLUTIONS

You can pick up voicemail in email or your online account, forward faxes and voicemail messages via email (or phone) to anyone, forward faxes to any email, create marketing messages in voicemail and forward them by email, and more.
